EMERGENCY

Operation 1:

1. The control centre or security office can call the ETEM-26B tower, and through the volume controlled loud speaker the caller can be heard clearly up to 500 meters.
2. The beacon & siren are activated when the control centre calls the tower. (there is a disable switch built-in, if you do not want this feature.
3. The beacon & siren are automatically disabled once the control centre speaks to the tower.
4. A distressed person can lift the handset to speak to the control centre.

Operation 2:

1. By lifting the noise cancelling handset the call is speed dialled automatically to the control centre.
2. The call is terminated once the handset is replaced.
